A Supplement to A Classified Bibliography on the History of Scientific Instruments

by A.V. Simcock

This list contains references to 255 articles and 76 books and pamphlets supplementary to the version of Gerard Turner's thirteen SIC annual bibliographies recently collected into book form under David Bryden's editorship (G. L'E. Turner & D. J. Bryden, A Classified Bibliography on the History of Scientific Instruments, Oxford: Scientific Instrument Commission, 1997). These additional references cover items published in the same period, 1980-1995 inclusive, but are mostly from the years 1990-95. They are presented under the classifications devised by David Bryden, slightly simplified on account of the smaller size of the present list; where appropriate, entries are repeated under more than one heading. As with Gerard Turner's original lists, the main source has been materials and information readily to hand, rather than systematic trawling of listings and databases. The compilation of this supplement is not meant to imply criticism of the Turner/Bryden bibliography, and has been undertaken in the same spirit the wish to bring information which happens to be accessible to some of us to the attention of the wider community of those interested in the history of scientific instruments.

Urs TILLMANNS, Leica im Spiegel der Zeit: 80 Jahre Leica - 40 Jahre Leica M - 10 Jahre Leica M6 (Vevey: Musée Suisse de l'Appareil Photographique, 1994) 73pp. In German, English, and French.

Istv n TRINGLI, "Petzval József Pesti évei ", Technikat "rténeti Szemle, vol.19, 1992, pp.25-33. Joseph Petzval (1807-1891), the mathematician and inventor who devised the first photographic lens.

Gernot VOLLATH, Die "sterreichische Photoindustrie 1945-1994: Kameras, Photozubeh "r, Photochemie, Dunkelkammergeräte, Projektoren, Sonderprodukte, Firmenchroniken (Linz-Puchenau: G. Vollath [the author], 1994) 184pp.

Herta WOLF, "Wolken, Spiegel und Uhren: Eine Lektüre meteorologischer Fotografien ", Fotogeschichte, vol.13 no.48, 1993, pp.3-18. Late 19th-century scientific cloud photography and its apparatus.

PHYSICS - MODERN

Robert E. FINNIGAN, "Quadrupole Mass Spectrometers: From Development to

Commercialization ", Analytical Chemistry, vol.66, October 1, 1994, pp.969A-975A.

Timothy LENOIR & Christophe LÉCUYER, "Instrument Makers and Discipline Builders: The Case of Nuclear Magnetic Resonance ", Perspectives on Science, vol.3 no.3, Fall 1995, pp.276-345. The interrelatedness of the need for large instruments and the development of departments or disciplines in 20th-century physics.

James Baker ROSS, "Davis' Magnetic Tube Concentrator ", Rittenhouse, vol.4 no.4, August 1990, pp.114-117. Instrument invented in 1913 for measuring the amount of magnetic iron in ores.

PRECISION MECHANICS (including tools)

Theodore R. CROM, Early Lancashire Horological Tools and their Makers (Hawthorne, Florida: Theodore R. Crom, 1994) 275pp.

Ted CROM, "The Rack Wing Compass and Calliper ", TATHS Newsletter (Tool and Trades History Society), no.47, Autumn/Winter 1994, pp.33-40. Dividers and callipers with rack-and-pinion arcs.

Roger DAVIES, "Peter the Great's Lathes ", TATHS Newsletter (Tool and Trades History Society), no.30, Summer 1990, pp.28-33.

Albrecht DÜRER, Géometrie, translation, introduction, and commentary by Jeanne Peiffer (Paris: Seuil, 1995) 415pp. Dürer's 1525 original is not an academic geometry but an instruction manual in geometrical drawing and measuring techniques for artists and artisans.

Hugh FERMER, "Machine Tool Manufacture in Sussex ", Sussex Industrial History, no.23, 1993, pp.13-31.

Günther HEINE, "The Wire Drawing Bench of the Elector August of Saxony in the Musée de Cluny in Paris ", Tools & Trades (Tool and Trades History Society), vol.8, April 1995, pp.44-55. An elaborately decorated workshop instrument made by Leonhard Danner, Nuremberg, 1565.

Joachim HENNZE (ed.), Schrauben und Gewinde, Museum für Schrauben und Gewinde (Sigmaringen: Thorbecke, 1992) 179pp.

Johan KNUTSSON, "A Seventeenth Century Collection of Rose Engines and Tools: Notes on the Turning Room at Skokloster, Sweden ", Tools & Trades (Tool and Trades History Society), vol.6, August 1990, pp.10-22. About 2,000 tools for woodworking and clockmaking, from large lathes to small hand tools, mostly 17th-century.

Jürgen RUBY, Maschinen für die Massenfertigung: Die Entwicklung der Drehautomaten bis zum Ende des Ersten Weltkrieges (Stuttgart: Verlag für Geschichte der Naturwissenschaften und Technik, 1995) 218pp. Machine tools, especially lathes, in the early phase of modern mass-production (19th century and beginning of 20th).

N. J. TINGEY, "Tools for Ring Fitting in the Retail Jewellery Trade ", TATHS Newsletter (Tool and Trades History Society), no.34, Summer 1991, pp.26-29. Including ring gauges and a ring cutter.

SCIENCE & TECHNOLOGY - GENERAL STUDIES (see also: mathematics & its applications; natural & experimental philosophy)

Laetitia BOEHM, "Artes mechanicae und artes liberales im Mittelalter: Die praktischen Künste zwischen illiterater Bildungstradition und schriftlicher Wissenschaftskultur ", in Karl Rudolf Schnith & Roland Pauler (eds.), Festschrift für Eduard Hlawitschka zum 65. Geburtstag (Kallmünz Opf.: Lassleben, 1993), pp.419-444.

Jean GIMPEL, The Medieval Machine: The Industrial Revolution of the Middle Ages, second edition, translated from the French (Aldershot: Wildwood House, 1988) 294pp.
